

Affinity Diagram

Write down your ideas about the project and place them under the appropriate category.

Product Ideas

Customizable academic planner:
A mobile app or software designed to sync with a university's course management system (such as Canvas or Blackboard) and automatically import assignments, deadlines, and exam schedules.

I-powered scheduling assistant:
A tool that automatically suggests study times and extracurricular activity slots based on the user's academic workload and availability.

Cross-platform integration:
The planner could integrate with email, Google Calendar, and other apps used by students for an all-in-one experience.

Group project manager:
A feature that allows students to collaborate on group projects, set deadlines, and track progress with classmates.

Cole Easley

Hurdles

Integration challenges with university platforms:
Many schools use different systems, which would require building multiple integrations.

Cole Easley

Time constraints for development: Creating a fully functional tool with all necessary integrations and features will take time.

Cole Easley

Difficulty in gathering user feedback:
Understanding the specific needs of students across different majors and universities can be time-consuming.

Cole Easley

Student adoption:
Convincing students to switch from their current tools to your platform might be difficult, especially if they are used to basic tools like Google Calendar.

Cole Easley

Data privacy and security concerns:
Universities might be hesitant to allow third-party platforms to access their data, requiring compliance with data security regulations.

Cole Easley

Pricing/Costs

Subscription model:
Offering a freemium service where students can use basic features for free, but pay for premium features like task prioritization, AI-assistants, or custom notifications.

Cole Easley

Operational costs:
Managing the cost of cloud storage, tech support, and platform maintenance as the user base grows.

Cole Easley

Student discounts:
Offering special pricing for students to make the service affordable and competitive.

Cole Easley

University partnerships:
Developing business partnerships with universities who can help subsidize the costs for students.

Cole Easley

Operational costs:
Managing the cost of cloud storage, tech support, and platform maintenance as the user base grows.

Cole Easley

Advertisement and Marketing

Targeted campus campaigns: Hosting events or digital campaigns on college campuses to promote the planner and offer free trials.

Referral program:
Offering users rewards, like free premium features or gift cards, for referring friends.

Basic Features

Course sync:
Automatic import of courses, assignments, and exam schedules from the university's system.

Notifications and reminders:
Send reminders for upcoming deadlines and exams.

Task prioritization:
Allow students to rank assignments or study time by priority and urgency.
